the horse power & S. M. Simpson. Of these cars, at the end of the 284 mile run, the Pope-Toledo was the only machine driven by Little. The plucky driver in which the Little Pope-Toledo was running had been subjected to the fracture of its first contact for the cap, the wheels were not racing cars, and it was of high speed type, as evidenced by the fact that the little machine finishing was a touring stock model.

The class of this year's entry is higher than ever before. The Lombard, Buick and Thomas creations show a great advancement in American manufacture. Examination of the entries will certainly enthrall enthusiasts over their construction. Americans should be gratified that eleven of our countrymen are engaged in the elimination struggle, win or lose, regardless of the great expense incurred. If mobile machines in this country in their ability to turn out such a fine record of achievement could withstand 2000-mile journeys, they would have no equal elsewhere.

This exhibition is a show which is worthy of note as the introduction of foreign

ner, so to speak, who can tell by a slight sound the least trouble in the machine.

Lytle and Digley are as clever as a pair of monkeys. They are the best of the Toledo force. The first named is a young fellow, a native of the city, who has an absolute lack of fear, which is a great advantage. He has fought many a battle, and has never been caught in a trap, and he has never been defeated in a fight. He is a great fighter, and he is a great fighter.

Caluso and De Blasi are from the same place. They are also very experienced in great road events, and they are also very experienced in the same. They are also very experienced in the same. They are also very experienced in the same.
